

Install an **ECOPOND**
biodiversity boosting
WILDLIFE POND

Installing a small pond in your garden, dedicated to wildlife, can really help provide space for struggling species and help give biodiversity a boost. Give a home to frogs, toads, newts and dragonflies. The pond is 120 litres. It's 128cm long, 90cm wide and 36cm deep. To get it started, it comes with a variety of native UK plants, a few invertebrates and some 'pond extract' to seed your ecosystem.

*It's a 1-day install and costs **£195***

*Want one? Call Jeff on 07814 532463 or email
jeff@drvickishaw.co.uk*

Maintenance of existing ponds can be undertaken for an agreed fee
