.....

Installing a small pond in your garden, dedicated to wildlife, can really help provide space for struggling species and help give biodiversity a boost. Give a home to frogs, toads, newts and dragonflies.

The pond is 120 litres. It's 128cm long, 90cm wide and 36cm deep.

To get it started, it comes with a variety of native UK plants, a few invertebrates and some 'pond sludge' to seed your ecosystem.

Flexible pond liners are an option, if you prefer... which could mean a slightly bigger pond!

***It's a 1-day install and costs £195***

Want one? Call Jeff on 07814 532463 or email [jeff@drvickishaw.co.uk](mailto:jeff@drvickishaw.co.uk)

Maintenance of existing ponds can be undertaken for an agreed fee
